

CLOUD VIDEO SIMPLIFIED

Build live video faster, any cloud, any scale.

MK.IO enables you to launch live or on-demand streams in minutes with a powerful, self-service platform.

Cloud-native. Ultra-flexible. Pay only for what you use.

Deploy on any cloud—Public, private, or your own infrastructure. Seamlessly integrate global video delivery, ultra-low latency, DRM, and dynamic ad insertion using simple, developer-friendly APIs.

Workflow management

Flawless live and on-demand streaming, built to scale

Manage your entire video workflow—from ingest to delivery—through a single, intuitive platform. MK.IO combines built-in AI and cloud orchestration for glitch-free, high-scale streaming with global reliability.

Live processing

Video storage
